PRIORITIZE TABLES FOR A COMPANY-WIDE PRICING AND COST REVIEW

INTRODUCTION

Tables generated a $16,937 net loss and an 8.46% negative profit margin, making them the largest source of losses within Furniture. Consistently negative margins across all customer segments suggest the need for a category-wide pricing and cost review.

TABLES UNDERPERFORM ACROSS ALL SEGMENTS

TABLES ARE THE ONLY FURNITURE SUBCATEGORY WITH NEGATIVE MARGINS ACROSS ALL THREE CUSTOMER SEGMENTS.

RECOMMENDATION

Prioritize a company-wide pricing and cost review for Tables, with a focus on identifying loss-making products and evaluating opportunities for margin improvement. Test targeted pricing adjustments and investigate product costs before considering discontinuation.
